Employment History

Oct 2025 – Present **AI Initiative Team Lead,** Braindeck Inc., Seocho-gu, Seoul, South Korea.

- Built a custom **ASR** model from scratch for Korean-language users with dysarthria, where no off-the-shelf solution was adequate, and integrated it into a real-time avatar communication platform with a **RAG**-based personalized communication tool.
- Fine-tuned and deployed **OpenAI Whisper** on custom datasets for domain-specific vocabulary and accent adaptation, and built **Voice Cloning** pipelines using **Fish Audio** (ASR, **TTS**, cloning) for on-premise deployment on limited GPU resources.
- Built an end-to-end pipeline for medically certified diagnosis, rehabilitation, and communication assistance for Korean-language users with dysarthria.
- Engineered the entire backend infrastructure for the avatar and medically certified rehabilitation applications utilizing **FastAPI**, and deployed these comprehensive **AI** services across **AWS**, **GCP**, and **Microsoft Azure**.
- Designed an advanced Multi-sensory Emotion Recognition Solution utilizing multisensor fusion (speech, facial expressions, biosignals) for precise emotion prediction.
- Architected a two-stage cascade **ML** system (**LightGBM** + **Random Forest**) for acoustic **NDT** defect classification of industrial fasteners (KPF), replacing a rule-based quality-control system with a data-driven **smart-manufacturing** pipeline over frequency-response (FRF) spectra.

Jul 2025 – Sep 2026 **AI Lead,** Brain Box Automations, Pakistan (Remote).

- Managed multiple projects in the AI department, supervising developers and maintaining client relations.
- Implemented **CI/CD for ML** pipelines and extensively developed production-grade AI agent-based services using **FastAPI**, **LangGraph**, and **LangChain** with focus on **LLMOps** and **MLOps**.
- Deployed scalable AI solutions on **AWS**, **GCP**, and **Microsoft Azure** platforms using **Docker** and **Microservices**.
- Built multi-agent research systems, niche coaching and cognitive assistants, AI-powered content management, and end-to-end recruitment automation pipelines with custom AI models, MCPs, and LLM tools, extensively leveraging **Gemini ADK** (Agent Development Kit) for complex multi-agent orchestration.

Employment History (continued)

Aug 2017 – Aug 2026

Graduate Student Researcher, Korea Advanced Institute of Science and Technology (KAIST), Daejeon, South Korea.

- Developed advanced **Machine Learning** techniques for signal integrity and equalizer optimization (Samsung DS collaboration), applying latent representation learning for **Anomaly Detection** in DRAM signals.
- Led intelligent robotics research, developing robust visual odometry and localization methods for highly maneuverable robots utilizing **Deep Learning**.
- Built and deployed an end-to-end **ML** application for regulatory intelligence, extracting and summarizing safety and health policies from diverse government documents.
- Applied **Deep Reinforcement Learning** algorithms (**PPO**, **DDPG**, **Q-Learning**) to control systems including quadcopters and autonomous land robots.
- Engineered fair data representation methods to mitigate bias in downstream utility tasks, advancing transparency in **ML** models.

Aug 2023 – Sep 2025

Freelance AI/ML Developer & Consultant, Self-Employed (Remote).

- Developed Full-stack AI applications and multimodal platforms utilizing **React**, **Next.js**, and **GraphQL**.
- Engineered advanced AI agents with **OpenAI API** (**GPT-4o**), **Anthropic Claude API**, **Gemini API**, and open-source models (**Qwen**, **Mistral**) utilizing **RAG**, **Vector Databases** (Qdrant, **Pinecone**), and advanced **Context Engineering**.
- Built production **Voice AI** pipelines for KindredPM (US) using **Deepgram** real-time WebSocket **STT** with voice activity detection and **Aura TTS** for low-latency conversational agents, and integrated **Gemini Live API** for real-time speech-to-speech with barge-in support and multilingual dialog.
- Provided client consultation for **LLMOps** operations and production deployment.

Feb 2016 – Jul 2017

Research Assistant, NUST - Robotics & Intelligent Systems Engineering (RISE Lab), Islamabad, Pakistan.

- Developed wearable fNIRS device for real-time hemodynamic brain profiling.
- Implemented signal processing and ML techniques for brain signal feature extraction supporting motor neuron disability research.

Jul 2016 – Sep 2016

Intern Application Engineer, National Instruments (NI), Islamabad, Pakistan.

- Completed LabVIEW certification training.
- Designed and implemented "Hybrid Control of Inverted Pendulum" project on NI hardware platforms.

Leadership, Entrepreneurship & Service

May 2026 – Present

Founder / Tech Track Participant, "Echo Project," Everyone's Startup Project (모두의 창업 프로젝트), Ministry of SMEs and Startups (Daejeon CCEI). Developing an **AI**-driven cognitive preservation platform; advanced via Fast-Track selection and secured **2,000,000 KRW** startup activity fund.

Leadership, Entrepreneurship & Service (continued)

Aug 2025 – Nov 2025 — **Representative & Lead Developer,** Team 'Viro,' 2025 KAIST Startup Crew (Laboratory-Specialized Startup Leading University Program), KAIST. Directed technical architecture and application development; secured **2,000,000 KRW** in startup support funding.

Aug 2023 – Feb 2024 — **Part-time Researcher,** KAIST (Part-time Scholarship). Executed targeted research tasks under the supervision of Prof. Sang-Gug Lee and Prof. Thomas Cho.

2018, 2022 — **KAIST EE Ambassador,** EEIO Ambassador Program. Represented KAIST EE at the National University of Sciences and Technology (NUST), Pakistan, conducting multi-campus recruitment seminars for prospective graduate students.

2021, 2024 — **Short-term Teaching Assistant,** KAIST EE Visit Camp. Coordinated camp logistics and facilitated research lab tours for prospective international students.

Sep 2018 – Feb 2019 — **Teaching Assistant,** KAIST EEIO. Managed information desk operations, supported international students administratively, and organized EEIO Visit Camp events.

Education

Aug 2019 – Aug 2026 — **Ph.D., Electrical Engineering,** Korea Advanced Institute of Science and Technology (KAIST).
GPA: 3.95/4.3 (Top 5%)
Thesis: *Learning Latent Representations for Anomaly Detection and Reinforcement Learning-Based Equalizer Optimization in High-Speed DRAM Systems*
Advisor: Prof. Dong Eui Chang

Aug 2017 – Aug 2019 — **M.S., Electrical Engineering,** Korea Advanced Institute of Science and Technology (KAIST).
GPA: 3.97/4.3 (Top 3.7%)
Thesis: *Towards Robust Neural Networks and Efficient Exploration in Reinforcement Learning*
Advisor: Prof. Dong Eui Chang

Sep 2013 – Jun 2017 — **B.E., Electrical Engineering,** National University of Sciences and Technology (NUST), Pakistan.
GPA: 3.99/4.0 (**Gold Medalist**)
Thesis: *Development of Functional Near Infrared Spectroscopy (fNIRS) based System for Detection of Distinctive Brain Signal Patterns*
Advisor: Prof. Fahad Mumtaz Malik
Co-Advisor: Prof. Yasar Ayaz
Awarded President of Pakistan Gold Medal for Best Graduate in Electrical Engineering

Research Publications

Patents

1. **M. Usama** and D. E. Chang, "Reinforcement learning-based equalizer parameter optimization method and system (original title: 강화학습 기반 이퀄라이저 파라미터 최적화 방법 및 시스템)," Korea Patent Application 10-2025-0119661, Aug. 2025.

2. **M. Usama** and Y. R. Jung, "Method and apparatus for monitoring health status of patient based on reliability using multiple biosignals (original title: 복수의 생체 신호를 이용하여 신뢰도를 기반으로 환자의 건강 상태를 모니터링하는 방법 및 장치)," Korea Patent Application 10-2025-0213058, Dec. 2025.

Skills

AI/ML — Deep Learning, Reinforcement Learning, Large Language Models (LLMs), Multi-Agent Systems (**LangGraph**, **Cognitive Architectures**), Foundation Model Fine-tuning, Parameter-Efficient Training (LoRA, ARD-LoRA), Computer Vision, NLP, **HuggingFace Transformers**, **Qwen**, **Mistral**, **LightGBM**, Gradient-Boosted Trees, **PPO**, **DDPG**.

Skills (continued)

LLM Ops	Context Engineering (**ReAct Context Engineering**), RAG Systems, Vector Databases, **MCP Server Development** (published integrations for ChatGPT, Claude, Perplexity), Custom LLM Tools, **OpenAI API**, **Anthropic Claude API**, **Gemini API**, **Gemini ADK**, Production LLM Deployment, **LLMOps**, **MLOps**, **NL2SQL**.
Voice AI	**Deepgram** (Real-time STT/TTS), **OpenAI Whisper** (Fine-tuning), **Fish Audio** (ASR/TTS/Voice Cloning), **Gemini Live API** (Speech-to-Speech), Custom ASR Training, Voice Activity Detection, Low-latency Conversational AI.
Coding	Python, PyTorch, TensorFlow, TypeScript, JavaScript, React, **Next.js**, Node.js, FastAPI, Flask, **Django**, **GraphQL**, LaTeX.
Tools	Git, **Docker**, **CI/CD**, Linux, LabVIEW, MATLAB, Gradio, Streamlit, Jupyter, VS Code.
Cloud & DB	**AWS**, **GCP** (Vertex AI, Cloud Scheduler), **Azure**, PostgreSQL, **pgvector**, **Neo4j**, **Elasticsearch**, SQLite, MongoDB, Qdrant (Vector DB), **Pinecone**, Redis.
Research	Academic writing, peer-reviewed publication, experimental design, statistical analysis, IEEE and journal submissions.
Languages	English (Fluent), Urdu (Native), Korean (Intermediate – TOPIK Level 2).

Honors & Awards

Awards and Achievements

2026	**Gold Reviewer**, ICML 2026 (International Conference on Machine Learning). Top reviewer recognition based on area chair ratings; awarded complimentary conference registration.
2025	**Winner – Logo Design Contest**, KAIST Space Institute. Worth 1,000,000 KRW.
	Excellent Idea Award, AI Technology Utilization in KAIST Administration Idea Contest, KAIST Center for Administration Development. Worth 300,000 KRW.
2017	**President of Pakistan Gold Medal**, Best Graduate in Bachelor of Engineering, NUST.
2022	**Special Society Award**, Worth 1 million KRW, Korean Artificial Intelligence Association.
2019	**AlphaPilot Qualifier**, Lockheed Martin AI Drone Racing Innovation Challenge. Team Puffin ranked 7th among 400+ teams.
2017	**Runners Up**, All Pakistan Engineering Category, AirTECH 2016, Air University.
	Runners Up, All Pakistan Embedded Systems Category, COMPPEC'17, CEME NUST.
2013–2016	**EME High Achievers Awards**, Consecutive recognition for academic excellence.
2013	**5th Position**, Among 102,080 students in FBISE HSSC Examination.

Certification

2016	**Certified Associate Developer – LabVIEW**. Awarded by National Instruments.
	PLC, HMI and SCADA Systems. Professional Training.
